## *Twelfth International Symposium on Mass Spectrometry in the Health & Life Sciences: Molecular & Cellular Proteomics*

*August 20 – 24, 2017  
San Francisco – Hotel Nikko*

The Twelfth International Symposium on Mass Spectrometry in the Health & Life Sciences will be held in San Francisco August 20-24, 2017 at the Hotel Nikko.

The meeting will begin with a full day workshop focused on proteomics in chemical biology and drug development followed by the main symposium. We attach a list of the currently confirmed speakers so you can see what we have been planning thus far. We always leave a number of speaker slots until later in Spring to make sure to identify and include younger scientists making contributions to both exciting biological challenges as well as to innovations in methods and technologies. We also select from the abstracts submitted by registrants for poster presentations.

Registration is now open. Please visit the website at:
